Integrated or Cloud SIM Server solution

› CALL TERMINATION: 40% more revenue with IRON eVS© technology

To lower the cost of international calls to GSM network, Internet Telephony Service Providers (ITSP) deploy solutions to **offer cheaper routes via VoIP to terminate voice calls to the mobile network.**

› BULK SMS: Deliver millions of SMS safely at a low price!

As the SMS market is massively growing all over the world, SMS aggregators deploy worldwide solutions to **terminate millions of SMS messages at a low price.**

iQsim Call & SMS Solution Benefits

iQsim delivers 2G/3G GSM Gateways and state-of-the-art SIM card management solution to **maximize revenues** made out of the call termination and bulk SMS business.

The iQsim solution is **SIM plan «centrix»** and **centrally manages SIM card lifecycle** through the steps of Allocation, Routing, Protection, Monitoring and Credit Control thanks to the **IRON eVS© technology.**

Call & SMS Termination

for Service Providers

Mobile Gateways

M100 - 4/8 PORTS 2G

- › Requires IRON Suite
- › **Dynamic IP** Support and **NAT** transversal
- › **Fanless** - Noise Level 0 dB

M400 - 12/16 PORTS 2G/3G

- › Requires IRON Suite
- › DHCP Support for an **easy deployment**
- › White labeled Equipment

M800 - 32 PORTS - 192 SIM CARDS

- › **All-in-One** Compact 3U Size
- › **Standalone** Gateway
- › Includes **IRON eVS® Technology**

SIM Server

- › SIM Card Management
- › Embeds **IRON eVS® Technology**
- › Integrated or Cloud versions

SIM Rack 256

- › Remote SIM cards access **over IP**
- › **Hot swappable** SIM Rack board
- › Up to 256 SIM cards in a 2U rackable chassis
